Subject: Hot Site Report - Dimock GW Site - Update #1

As previously noted, 10 of the residents were visited on 12/29/11 and 12/30/11. Scheduling of residential visits resumed today, with 4 homes scheduled today and up to 3 "cold calls" planned at additional homes. The survey of the initial 19 homes is expected to be completed by Saturday, 1/7/12. The survey team expects to add other homes (in the immediate neighborhood of the original 19 homes) that were not previously assessed. The team will review 911 information to identify these additional homes.

OSC Fetzer continues to evaluate the potable water situation at individual homes. START is reviewing/collating the large amount of existing data to create a searchable database. The draft sampling plan is in the final stages of review.

Montrose FD has given preliminary approval for EPA to stage equipment at their location. The OSC sent the EPA fact sheet to the NE Regional Director of PADEP - Wilkes-Barre, as well as to the Susquehanna County EMA Director.

Press coverage has been moderate, with a brief clip at WNEP and an article in the Scranton Times-Tribune.

Subject: Hot Site Report - Dimock GW Site - Update #2

Residential well survey results to-date: The 19 wells included in the Consent Order between PADEP and Cabot were prioritized for the survey. 12 of these 19 wells have been surveyed. None are reported to be drinking raw well water. There is a combination of bottled water, water buffaloes and treatment systems in use. 2 additional surveys are scheduled for this evening. Survey teams have been unable to contact 3 residents so far.

4 other wells in the immediate neighborhood of the original 19 have also been surveyed. None are reported to be drinking raw well water, but are drinking bottled water provided by Cabot.

Well surveys will continue thru this week and updated results will be provided as they are collected and summarized.
